

Immunohistochemistry

This section is only required to fill out if immunohistochemistry was used on the slide. If you did not, you will just need to answer “No” to the top question.

Target Protein:

Enter the name and description, e.g. CD

Detection Method Values: *ABC (avidin-biotin complex), Alkaline Phosphates, Diaminobenzidine, FITC, Horseradish Peroxidase, LSAB (labeled streptavidin-biotin), RPE*

For each antibody, enter the following: **Target Species, Host Species, Dilution, Lot Number, Cat Number, Source Name, Source City, Source State, and RRID**

For the primary antibody, choose its **Clonality**: *monoclonal, polyclonal*
